SUMMARY

Java Software Engineer with 5+ years building and operating backend and event-driven messaging infrastructure for capital markets trading platforms. Core Infrastructure team member managing 550+ Apache Kafka topics and Java/Spring Boot deployments in production, supporting 60+ live Dynamic Message Object (DMO) data contracts, and remediating 20,000+ Linux and Java dependency vulnerabilities in six months. Re-engineered a bash-based deployment pipeline into a database-driven, multi-threaded process, cutting deployment time 60% (30 minutes to 12). Supports 7 engineering teams across CI/CD, distributed systems, and release management.

WORK EXPERIENCE

Software Development Engineer, Core Infrastructure

June 2023 - Present

Clearpool Group (BMO Capital Markets)

New York, NY

- Manage 550+ Apache Kafka topics in production, supporting Java-based services and deployments across multiple products organization-wide.
- Re-engineered the deployment pipeline from bash scripting into a database-driven, multi-threaded Java process, reducing deployment time from 30 to 12 minutes (60% faster).
- Triaged and remediated 40,000+ security vulnerabilities in six months across Linux packages and Java (Maven/Gradle) third-party dependencies, coordinating upgrade cycles for security and compliance.
- Design, build, and support 60+ live, production-ready Dynamic Message Object (DMO) compilations in Java, defining cross-product messaging schemas and data contracts.
- Develop and maintain backend services in Java and Spring Boot, ensuring cross-environment compatibility and managing release branch promotion for QA validation.
- Provide production support and infrastructure troubleshooting to 7 engineering teams, performing root cause analysis on messaging, deployment, and dependency issues.
- Author JUnit and Jest unit and integration tests and automate delivery through Jenkins CI/CD pipelines, maintaining code quality across releases.

Front End Engineer (Apprenticeship)

September 2019 - June 2020

MarketCOL

Newark, NJ

- Improved application efficiency 20% and expanded functionality 50% within 9 months by revamping 30+ reusable UI components using JavaScript (ES6), TypeScript, and React.js.

Front End / UI Developer (Apprenticeship)

January 2019 - May 2019

SunTrust Bank

Atlanta, GA

- Built and unit-tested reusable UI components for internal banking tools using JavaScript, HTML5, CSS3, and Jest.

PROJECTS

Yahoo Finance — yhfinance.netlify.app

Nov 2023 - Present

- Built a real-time single-page application on the MERN stack (MongoDB, Express.js, React.js, Node.js) with WebSocket streaming and third-party market-data APIs (Finnhub, Financial Modeling Prep); automated regression testing with Selenium.

AWS Console — awsui.netlify.app

Nov 2022 - Present

- Implemented AWS Cognito authentication and an AWS Cloudscape design-system UI backed by GraphQL and AWS Amplify; added a caching layer that reduced API response times 50% and server costs 15%.
- Refactored legacy code with cross-functional teams, reducing system errors 40% and delivering 5 features ahead of schedule.

EDUCATION

Master of Science, Computer Science

May 2022

New Jersey Institute of Technology

Newark, NJ

Bachelor of Engineering, Computer Science

June 2018

Gujarat Technological University

Gujarat, India

SKILLS

Languages: Java, JavaScript (ES6), TypeScript, Python, SQL, Bash, XML, JSON, YAML

Messaging & Event Streaming: Apache Kafka, Kafka Topic Management, Kafka Producer/Consumer APIs, Event-Driven Architecture, Message Queues, Publish-Subscribe, Real-Time Data Streaming, Distributed Systems

Backend & APIs: Spring, Spring Boot, Node.js, Express.js, RESTful API Design, GraphQL, WebSockets, Microservices

DevOps, CI/CD & Cloud: Jenkins, CI/CD Pipelines, Docker, Kubernetes, Terraform, Infrastructure as Code, AWS (EC2, ECS, S3, RDS, ECR, Secrets Manager, Redis, Cognito), Git, GitHub, GitLab, Maven, Gradle, Linux/Unix, Release Management

Security & Vulnerability Management: CVE Triage, Vulnerability Remediation, Dependency Patching (Maven/Gradle), Linux Package Patching, Security Compliance, Key Management, Cryptography

Testing & Quality: JUnit, Jest, Cypress, Selenium, Unit Testing, Integration Testing, Test-Driven Development (TDD), Code Review

Databases: MySQL, Microsoft SQL Server, PostgreSQL, Redis, RDBMS, Database Design, Query Optimization, DBeaver

Frontend: React.js, Redux, Vue.js, jQuery, HTML5, CSS3, Responsive Design

Architecture & Practices: Distributed Computing, High Availability, Scalability, Fault Tolerance, System Design, Multithreading & Concurrency, Agile/Scrum, SDLC, Code Refactoring, Root Cause Analysis, Production Support
